

Food Ordering system

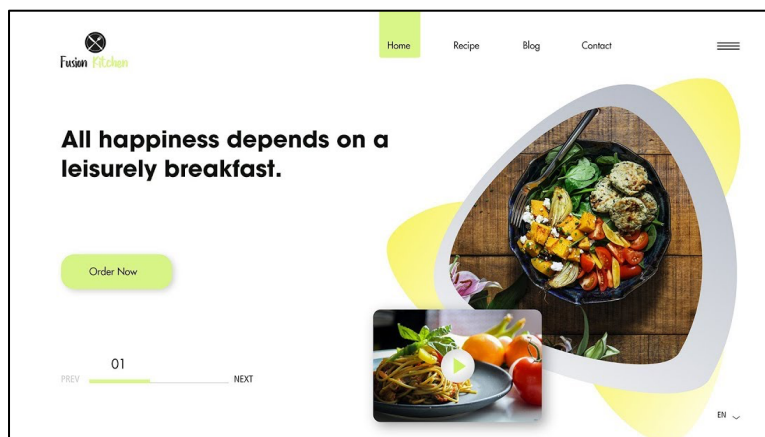

Online food ordering is a process of ordering food from a local restaurant or food cooperative through a web page or app. Much like ordering consumer goods online, many of these allow customers to keep accounts with them in order to make frequent ordering convenient. A customer will search for a favorite restaurant, usually filtered via type of cuisine and choose from available items, and choose delivery or pick-up. Payment can be among others either by credit card or cash, with the restaurant returning a percentage to the online food company.

Expected list of features

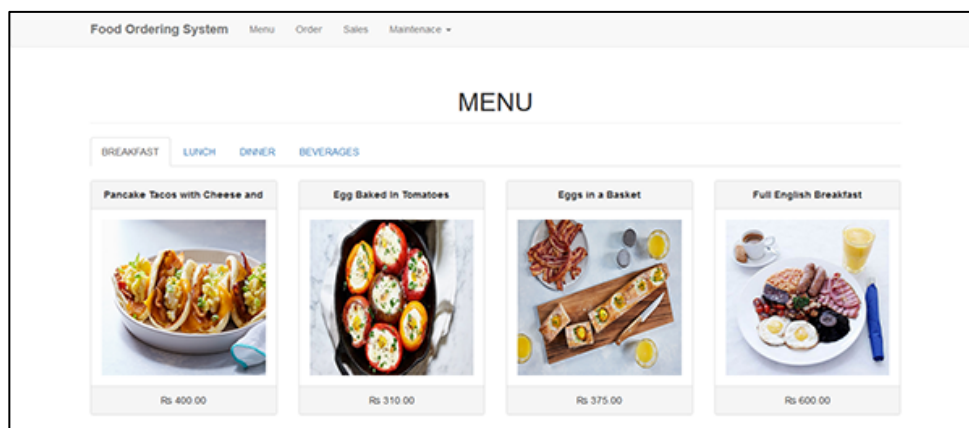

Some expected list of features of the proposed website are listed below: ● A customer will search for a favourite restaurant,

- Choose delivery or pick-up
- Payment can be among others either by credit card or cash.
